HEALTH
PREDICTIONS
PHARMA

Clinical trial care, delivered at home.

Professional home nursing that supports participants and connects with study teams.

HEALTH PREDICTIONS PHARMA

HOME NURSING FOR CLINICAL TRIALS

Study support, from planning to each home visit.

A coordinated service delivered in partnership with Investigator Sites and study teams.

Nursing care at home

- Biological sample collection, including challenging blood draws
- Study drug administration and requested support for self administration
- Subject monitoring, visit observations and reporting of health changes
- Respectful communication tailored to participant needs

Support around the visit

- Trial planning and coordination with sites and study teams
- Nurse training for each study, with protocols and visit resources
- Study kits, supplies and equipment brought to the home
- Secure visit documentation and communication with the site

Comfort for participants. Capacity for sites.

Home visits can reduce the need for site attendance and help make participation more convenient, while supporting site capacity.
